

Important Message

Please take notice of the following message that appears when you begin using the portal. Some data layers may not appear on the map when selected, but are viewable through the aggregate summary tool.

West Virginia Health Data Portal

Individual healthcare provider data is only available through the secure portal. Zip code, county, and state aggregates for providers are still available through the Aggregate Summary Tool located in 4. Select a Tool for Further Analysis.

Continue to show this message for all layers

Menus: old versus new

The menus demonstrated in the tutorial video have been consolidated into one menu located on the right-hand side of the portal application.

The screenshot shows a vertical menu on the right side of the portal application. At the top, there is a toolbar with icons for search, zoom, pan, home, back, forward, print, share, and help. Below the toolbar, the menu is organized into four main sections:

1. Select a Basemap
2. Select a Geographical Area
3. Select Map Layer
 - > Layer Details
 - Baseline
 - Primary Care Workforce
 - Allied Health Workforce
 - Aging Workforce by County
 - Specialty Care Workforce
 - Federal Influences
 - Healthcare Determinants
 - Additional Indicators
 - Health Outcomes
 - Healthcare Training
 - Nutrition Professionals
 - Community Services
 - Healthcare Facilities
 - Human Resource Centers
4. Select a Tool for Further Analysis

At the bottom of the '3. Select Map Layer' section, there is a blue button that says "Click Here to view Secure Layers".

Data Layers: Turning data layers on/off

To turn data layers on/off, use the menu “3. Select Map Layer” located on the right-hand side of the portal application. The checkboxes next to the data layer name toggle the layer on and off.

Tools Menu: Aggregate Summary, Identify, Buffer, Service Area, and Routing Tools

The tools referenced in the tutorial videos are now within the “4. Select a Tool for Further Analysis” menu located on the right-hand side of the portal application. To select a tool, click “4. Select a Tool for Further Analysis” and then select the specific tool from the drop-down menu.
